WHY?

ARINI

SETS THE SCENE

Choice of light distributions in rotational symmetric or rectangular beam patterns is suitable for many lighting applications

WHY?

ARINI

BEAUTIFUL

Light, multifunctionality and design, inspired by nature will enhance any urban space.

FLEXIBILITY

Can be equipped with other functionality in addition to lighting. CCTV, GOBO, speakers and Wi-Fi are just some examples.

Ensuring a high degree of security, communication, networking and attractiveness in urban areas

WHY?

ARINI

ADJUSTABLE

Adjustment of the luminaire head in 10° increments, horizontal max. 120° and vertical max. 130°. Adjustment of the shield plate by 360° possible.

VERSATILITY

If illuminated with RGBW, three controller variants (CASAMBI, DMX, DALI) are available.

CONFIGURABLE

Three different pole styles with optional spires provides an expanded choice of looks to match to site details.
